EXAMINER'S AMENMENT

The Examiner initiated a telephone call with the Applicants (Mr. Chales E. Shemwell 40,171) on 5/16/06. The examiner informed the Applicants that claim 41 depend from claim 40, which is a canceled claim. The Applicant authorized the Examiner to make a correction by an examiner amendment. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Please make the following amendment:

CLAIM 41:

Line 1, replace "claim 40" with --claim 39--

REASONS FOR ALLOWANCE

The following are the Examiner's statements of reasons for allowance:

The prior art does not teach or suggest the combination and relationship between these features:

1. *The primary reasons for allowance of independent claims 1-4, 6-7, 9-13, 49-51, and 53-54 in the instant application is the combination with the inclusion of the following limitations: **"translating the second bit group from the second position to second position of the comparand in response to second translation information;***

selecting the first translation information in a first cycle and the second translation information in a second cycle”

2. *The primary reasons for allowance of independent claims 14-15, 17-19, 21-28, 39, 41-42, and 46-47 in the instant application is the combination with the inclusion of the following limitations: “a decode circuitry coupled to the storage element to*

decode the translation information and to establish a connection in the switch circuit between the first position and position in comparand”

3. *The primary reasons for allowance of independent claims 29-30 and 32-38 in the instant application is the combination with the inclusion of the following limitations: “the*

output coupled to the CAM array to transmit the comparand to the CAM block, wherein each of the plurality of translation circuitry is configured to translate the plurality of bit groups over multiple operation cycles”

4. *The primary reasons for allowance of independent claims 43 and 45 in the instant application is the combination with the inclusion of the following limitations:*

“means for translating, in response to translation information, a bit group from a position of an input data having a plurality of bit groups to a different position in a comparand”

5. *The primary reasons for allowance of independent claims 56-60 in the instant application is the combination with the inclusion of the following limitations: “wherein*

the second input is configured to receive the translation information indicative of translation of the first bit group from the first position to a different position in a comparand”

Conclusion

Any inquiry concerning this communication should be directed to Hashem Farrokh whose telephone number is (571) 272-4193. The examiner can normally be reached Monday-Friday from 8:00 AM to 5:00 PM.
